

Dr. Bowman does a comprehensive eye exam at Eye Care Optical.

The following are the options to check the health of the eye:

_____ The Optomap is a picture, no dilation is required. Cost is \$29

_____ Dilation of pupils. Eyes will be blurry and light sensitive for 4-6 hours. No additional cost

_____ I do not want either because I see an ophthalmologist on a regular basis.

_____ I refuse the photo and the dilation. I realize the doctor can not see everything in the back of my eye if I choose this.
